Through an exclusive bonding process that eliminates voids in the bullet core, AccuBond® couples Nosler's proven copper-alloy jacket with its special lead-alloy core. The result is a bullet that flies true, penetrates deep and retains its weight, without causing extensive barrel fouling. AccuBond® Long Range Bullets

[Ballistic Tip Hunting Bullet | Nosler - Bullets, Brass ...](#)

Ballistic coefficients were originally defined by Ingals as a number indicating velocity erosion due to air drag for a given bullet compared to a standard projectile of the same shape- 1 inch in diameter and weighing 1 pound. By sticking with this 120-year-old non-aerodynamic standard, bullet companies ensure their BCs will be as large as possible.
